DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2 rejected under 35 U.S.C. 102(b) as being anticipated by Kohler (US. 4,361,331).

Regarding claim 1: Kohler discloses a ring-shaped metal gasket (4) comprising an annular main body (main body of 4) having a square cross section (center of 4 which is the main body has a square cross-section), a pair of annular arm portions projecting circumferentially outwardly (20 and 21) of the annular main body in a bugle state at a predetermined angle (angle of the annular arm portions), an annular projecting portion bulging circumferentially inwardly (bulging portion formed by 6) of the annular main body with a height larger than the axial height of the annular main body (the height of the annular projecting portion is greater than the height of the annular main body).

Regarding claim 2 (figures 2a-2d): Kohler discloses a ring-shaped metal gasket (4) comprising an annular main body (main body of 4) having a square cross section (the main body has a square cross-section), a pair of annular arm portions projecting circumferentially inwardly (arms 20 and 21 of figures 2a-2d are projecting radially inward) of the annular main body in a
